

PNAM Autumn School

PNAM Autumn School about Application of Neutrons and Synchrotron Radiation in Engineering Materials Science

PNAM Autumn School

[Registration](#)

[Contact](#)

The Autumn School will provide a systematic overview of application of neutrons and synchrotron radiation to the structural analysis of engineering materials. Students and young scientists from research and industry from all of Europe interested in this field are welcome to participate.

The school will take place from 17th to 21st September 2007 in the conference centre [Haus am Schüberg](#) near Hamburg. The participants will spend two days doing neutron experiments at [GKSS](#) and synchrotron experiments at [DESY-HASYLAB](#).

You can register for the school using the online registration provided on this website.

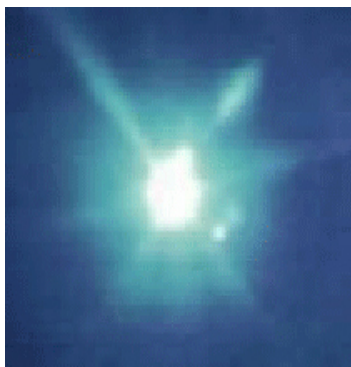

The participation fee is 300 €. It includes accomodation and food for the duration of the school. Financial support is possible for up to 10 students form EU countries outside Germany
