

## Memo for usage of the 7-days-regulations

- Not valid for HZB-coworkers
- Not valid for members of a beamtime, except user of the MX-beamline.
- BESSY II is still control area! This includes that pregnant and nursing woman will get no access, same for people younger than 18. The person who cares about the visitor is pleased to pay attention to this.
- The application form must be filled out by a HZB-member, who is later responsible for the visitor.
- The sentence "just watch don't touch" is easy to use for visitors and trainees.
- Service personal can get access to BESSYII according to the 7-days-regulations, IF there is NO RPDC (Radiation Protection Delimitation Contract) yet.  
If we already have a contract, the 7-days-regulations would not fit.
