Preface

This supplement to the Annual Report 2005 is supposed to provide in addition to the scientific highlights of the HMI a survey of the scientific activities in terms of publications, contributions to conferences etc.

Following the internal organisation of the institute, these lists are ordered along the divisions, departments and, wherever reasonable, along the R&D-projects within the latter. Publications and conference contributions are ascribed to a definite R&D-project. When authors from different departments have contributed, this contribution is listed under all involved departments and the respective R&D-project is indicated.

The organisation chart valid for 2005 reads as follows:

The supplement was generated mostly from an internal data base installed over the last two years. We would like to thank Marion Schröder and Volker Denzer (Central Data-Processing & Network) for a lot of technical support.
