

### **Professor Ib Chorkendorff**

Professor Ib Chorkendorff earned his Ph.D. degree in Physics at the Physics Institute, Odense University. In 1986-87 he was post-doc with professor John Yates Jr. at Pittsburg University, USA. He then joined The Technical University of Denmark (DTU) as Associate Professor in 1987. In 1999 he was appointed Professor in Heterogeneous Catalysis at Department of Physics and Chemical Engineering at DTU. From 2005 he has been Director of “Center for Individual Nanoparticle Functionality” CINF at Department of Physics, DTU, [www.cinf.dtu.dk](http://www.cinf.dtu.dk) and since 2012 has also been Director of “Catalysis Initiative for Sustainable Energy” (CASE) [www.case.dtu.dk](http://www.case.dtu.dk). The main interest of Professor Ib Chorkendorff is surface reactivity applied in the field of Heterogeneous catalysis, Electrocatalysis and Photocatalysis for energy harvesting, conversion, and storage as well as environmental protection. Ib Chorkendorff has co-published more than 245 scientific publications, one book, and submitted 18 patents.
