

Leif Hammarström

Leif Hammarström (b 1964) is since 2004 Full Professor of Chemical Physics at Uppsala Univ. He took his PhD in physical chemistry at Uppsala University in 1995 and then carried out post-doctoral studies at Bologna University/CNR, Italy. He is recognized as one of the world leaders in proton-coupled electron transfer, Ru(II)-polypyridine photosensitizers and mechanistic studies in artificial photosynthesis and he has more than 130 scientific publications in these fields with 700 citations during 2012 (h-index: 44). He is a founding member and group leader of the Swedish Consortium for Artificial Photosynthesis.
