Brisbane · Singapore · Toronto

# Contents

## I. Metallic Foams

Processing of Metal Foams - Challenges and Opportunities <i>C. Körner, R. F. Singer, University of Erlangen-Nürnberg (D)</i> .....	3
Influence of Process Parameters on the Expansion Behaviour of Aluminium Foams <i>J. Banhart, I. Duarte, Fraunhofer-Institut, Bremen (D)</i> .....	14
The Production of Aluminium Foam by PM and Examples for Application <i>J. Baumeister, IFAM (D); F. Baumgärtner, H. Gers, Schunk-Honsel-Entwicklungsgemeinschaft (D); W. Seeliger, W. Karmann GmbH (D)</i> .....	22
Processing and First Characterization of Ferrous Foams <i>W. Bleck, U. Mohr, RWTH Aachen University of Technology (D)</i> .....	28
Fabrication and Compressive Response of Open-Cell Aluminum Foams with sub-Millimeter Pores <i>J.-F. Despois, A. Mortensen, C. San Marchi, Swiss Federal Institute of Technology, Lausanne (CH)</i> .....	34
Precision Cast Near Net Shape Components Based on Cellular Metal Materials <i>Ch. Hintz, P. R. Sahn, I. Wagner, RWTH Aachen, Germany</i> .....	40
Casting Process for the Production of Foamed Magnesium Structural Parts <i>Fr. W. Bach, Universität Dortmund (D); D. Bormann, H. Haferkamp, M. Niemeyer, Universität Hannover (D)</i> .....	46
Modeling of Material Redistribution During Melt Route Processing of Metallic Foams <i>T.W. Clyne, V. Gergely, University of Cambridge (UK)</i> .....	51
Non-destructive 3-Dimensional Microtomography for Metallic Foams <i>E. Buelens, A. Sassov, SkyScan, Aartselaar (B)</i> .....	57
Fabrication of Squeeze Castings with Permanent Aluminium Foam Cores <i>H. Kaufmann, R. Kretz, Leichtmetall-Kompetenzzentrum Ranshofen (A)</i> .....	63
Deformation of a Metallic Foam studied by X-Ray computed Tomography and Finite Element Calculations <i>J.Y. Buffiere, E. Maire, G. PEIX, F. Wattebled, INSA de Lyon, Villeurbanne (F)</i> .....	68
Mechanical Behavior of Aluminum Foam Under Uniaxial Compression <i>H.P. Degischer, B. Foroughi, A. Kottar, B. Kriszt, Vienna University of Technology (A)</i> .....	74

## VIII

Dynamic Behavior of Melt-Foamed Aluminum under Compressive and Tensile Loads  
*W. Bleck, Th. Böllinghaus, H. von Hagen, RWTH Aachen, University of Technology (D)*.....83

### Fracture of Metal Foams

*Ch. Motz, R. Pippan, Austrian Academy of Sciences, Leoben (A);*  
*U. Galovsky, Leichtmetall Kompetenzzentrum Ranshofen (A)*.....90

### Development of Energy Absorber Elements to improve Vehicle Crashworthiness during low speed Impact

*L. Lorenzi, M. Parisi, Centro Ricerche Fiat (I);*  
*M. Valente, A. Zanoni, Universita di Roma (I)*.....96

### Fatigue Threshold in Aluminium Alloys

*G.P. Cammarota, A. Casagrande, L. Orazi, University of Bologna (I);*  
*H. Herold, M. Streitenberger, M. Zinke, University Otto von Guericke of Magdeburg (D)*..104

## II. Metal Matrix Composites

### Assessment of Metal Matrix Composites for Innovations" a Thematic Network within the 4 th EU-Framework

*H.P. Degischer, M. Doktor, P. Prader, Vienna University of Technology (A)* ..... 113

### High Strength Al-Zn-Mg Matrix-alloy for Continuous Fibre Reinforcement

*H. M .Flower, S. Yong, Imperial College of Science, Technology & Medicine, London (UK);*  
*D. Fettweis, E. Neussl, P. R. Sahm, RWTH Aachen (D)*..... 119

### Mechanical Properties of Carbon Fibre – Reinforced Al and Mg Under Various Manufacturing Conditions

*H. Kaufmann, P. Schulz, Leichtmetall-Kompetenzzentrum Ranshofen (A);*  
*H. Capel, University of Nottingham UK*.....128

### Porosity of Metal Infiltrated Composites – an Attempt at the Problem Analysis

*J. Grabian, Maritime University of Szczecin (P);*  
*J. Jackowski, Technical University of Poznan (P)*..... 133

### Titanium MMC's - Design and Manufacturing

*S.P. Godfrey, J.G. Robertson, C.M. Ward-Close, Research Agency (DERA),*  
*Farnborough (UK)*..... 140

### Carbon Fibre Reinforced Copper Matrix Composites: Production Routes and Functional Properties

*W. Buchgraber, G. Korb, Austrian Research Centers, Seibersdorf (A);*  
*B. Kempf, Degussa-Hüls, Hanau (D);*  
*T. Schubert, Fraunhofer-Institut, Dresden (D)*..... 150

Damage Evolution Inside a Notched Sample of Metal Matrix Composite Studied by Synchrotron X-ray Micro-tomography <i>G. Peix, CNDRI INSA Lyon, Villeurbanne Cedex (F); P. Cloetens, European Synchrotron Radiation Facility, Grenoble CEDEX (F); J.-Y. Buffière, R. Künzi, E. Maire, GEMPPM, INSA Lyon, Villeurbanne Cedex (F)</i> .....	156
The Effect of Spatial Distribution of Reinforcement on the Fracture of Particle Reinforced MMCs <i>P. Mummery, National Physical Laboratory, Teddington, (UK); N. Burdekin, University of Leeds (UK); I. Stone, University of Oxford (UK)</i> .....	162
Influence of the Fiber-Matrix Interface on the Strength of Unidirectional Carbon Fiber Reinforced Magnesium Composites <i>C. Körner, M. Ötmüller, R.F. Singer, Friedrich-Alexander Universität Erlangen-Nürnberg (D)</i> .....	168
Influence of Mean Strains on the Thermal-Mechanical Fatigue Behaviour of the Cast Aluminium Alloy AlSi10Mg Reinforced with 15 Vol.-% Al <sub>2</sub> O <sub>3</sub> (Saffil) Short Fibers <i>T. Beck, K.-H. Lang, D. Löhe, Universität Karlsruhe (D)</i> .....	174
Thermal Conductivity of SiC Reinforced Magnesium Matrix Composites <i>P. Lukác, A. Rudajevová, Charles University, Praha (CZ)</i> .....	179
Dislocation Generation in Mg Composites During Thermal Cycling <i>F. Chmelik, P. Lukác, Z. Trojanová, Charles University Praha (CZ)</i> .....	184
Fatigue of a SiC-Fibre Reinforced Titanium Matrix Composite: Experimental Results and Modelling <i>H. Assler, J. Hemptenmacher, P.W.M. Peters, Z. Xia, DLR - German Aerospace Center, Köln (D)</i> .....	190
Cyclic Creep of a Short-Fiber Reinforced Aluminum Alloy <i>H. Wang, E. Arzt, A. Flaig, A. Wanner, Universität Stuttgart (D)</i> .....	196
Model of Indentation Creep in Fiber Reinforced MMC Alloys <i>G. Cseh, J. Lendvai, Eötvös University, Budapest (H); J. Bär, W. Berger, H.-J. Gulladt, Universität der Bundeswehr München, Neubiberg (D)</i> ....	202
Creep of Magnesium Composites Induced by Thermal and Mechanical Loading <i>F. Chmelík, P. Lukác, Charles University, Prague (CZ); K.-U. Kainer, J. Kiehn, F. Moll, B. Schwill, Technical University Clausthal, Clausthal-Zellerfeld (D)</i> .....	209
Design of New High Temperature Materials by Dual Scale Particle Strengthening <i>M. Bäker, J. Rösler, Technische Universität Braunschweig (D)</i> .....	215
Design and Fabrication of Shape Memory Alloy Actuated Titanium Matrix Composites <i>T. Hashizume, T. Kobayashi, H. Toda, Toyohashi University of Technology (J)</i> .....	221

Development of High Ceramic Volume Fraction Near-Absolute-Net-Shape Cast Alumina, Boron Carbide and Silicon Carbide Reinforced Aluminum and Copper Matrix Composites for Automotive and Aerospace Applications <i>J.A. Cornie, M.L. Seleznev, B.M. Shulz, S. Zhang, Metal Matrix Cast Composites, Inc., Waltham, MA (USA)</i> .....	227
Relations Between the Structure and Mechanical Properties of the MgAl - SiCp Composite <i>A. Bochenek, K.N. Braszczynska, Technical University of Czestochowa (P)</i> .....	233
Characterisation of the SiC/AlMg10 Composite Interfaces <i>J. Braszczynski, A. Zyska, Technical University of Czestochowa (P)</i> .....	237
Composite Chips Production and Properties for Vibratory and Surface Finishing <i>Z. Konopka, Technical University of Czestochowa (P)</i> .....	243
A Comparative Study of the Possibilities of B, Nb, Ti and V Using as Microalloying Elements in PM Steels Strengthening <i>M. Orban, A. Palfalvi, Technical University of Cluj-Napoca (RO)</i> .....	248
Processing and Properties of Ternary High-strength Cu-Cr Based Metall Matrix Composites <i>D. Raabe, Max-Planck-Institut für Eisenforschung, Düsseldorf (D); K. Miyake, H. Takahara, Mitsui Kinzoku, Saitama (J)</i> .....	251
Forging Behaviour and Properties of High Strength Aluminium Alloy - Haematite Metal Matrix Composites <i>V. Divakar Rao, Vishnu Forge Industries Ltd., Bangalore (IND)</i> .....	258
Tensile Loading of Two-Phase Al-SiC Materials <i>B. Kosec, University of Ljubljana (SLO)</i> .....	263
Changes in the Microstructure of Mg-Nd based Composites due to Thermal Loading estimated by internal damping measurements <i>P. Lukác, Z. Trojanová, Charles University, Praha (CZ); J. Kiehn, Technical University Clausthal (D)</i> .....	268
Thermal-Mechanical Fatigue of the Oxide Dispersion Strengthened Aluminium Al-1.5 Al <sub>2</sub> O <sub>3</sub> <i>M. Beck, K.-H. Lang, D. Löhe, O. Vöhringer, Universität Karlsruhe (D)</i> .....	273
Processing and Rupture Properties of Model Al/ZrO <sub>2</sub> Metal Matrix Composites <i>L. Babout, J.Y. Buffiere, R. Fougères, E. Maire, C. Verdu, GEMPPM, INSA-Lyon, Villeurbanne Cedex (F)</i> .....	279
Optimization of the Wear Resistance - Mechanical Strength of some Fusion Tungsten Carbide Particulate Reinforced MMCs by Compositional Design <i>V. Constantinescu, S. Domsa, R. L. Orban, Technical University of Cluj-Napoca (RO)</i> .....	285
Locally Resolved Hysteresis Measurement <i>H. P. Kugler, R. Schwarze, Fiedler Optoelektronik GmbH (D); O. Reese, R. Renz, University of Kaiserslautern (D)</i> .....	291

**Influence of Pressure Oscillation on the Compaction of Powder Mixtures Containing Soft and Hard Components**  
*A. Laptev, Donbass State Engineering Academy, Kramatorsk (UA);*  
*A. Zavalianos, Drexel University, PA (USA).....296*

**Degradation of interface in SiCp/AlMg and Al<sub>2</sub>O<sub>3</sub>p/AlMg composites at elevated temperature**  
*A. Olszówka-Myalska, Silesian University of Technology, Katowice (PL).....302*

**Low Cost Particulate Reinforced Aluminium Matrix composites for Automotive Brake Drum**  
*L. Lorenzi, A. Zanoni, Centro Ricerche Fiat, Orbassano (I);*  
*C. Badini, P. Fino, Politecnico di Torino (I).....308*
