PM Lightweight and Porous Materials

Forming of PM Preforms from Al-Cu-Si Alloy in Semi - Solid State Stefan Szczepanik	1
Effect of Sn additions on Microstructure Evolution in Sintered Aluminium Alloys. S K Rout, G Veltl, F Petzoldt	7
Improvement in the Sinterability of 7-xxx-based Aluminium Premix J Gradl, H -C Neubing, A Müller	13
Evaluation of Wear Resistance in PM Alloys by Means of Microscratch Testing J Caro, D Casellas, J M Prado	21
The Characteristics of Products using Rapidly Solidified Aluminum Alloy Powders, produced by the Sinter Forging Method Junichi Ichikawa , Hideo Shikata	27
Processing simplification of mechanically alloyed Aluminium by powder annealing J Cintas, F G Cuevas, J M Montes y E J Herrera	33
Effect of Mg Addition on Sintering Characteristic of 7xxx Series Al PM Alloy Young Do Kim, Kyung Ho Min, Shin Pil Kang, Si-Young Chang	39
Dimensional Changes and Secondary Porosity in Liquid Phase Sintered Al Alloys J M Martín, B Navarcorena, I Arribas, T Gómez-Acebo and F Castro	45
Flow properties of Aluminium based powders for powder metallurgy L C Falticeanu, I T H Chang, R Cook and M A Kearns	53
Static and Fatigue Properties of Cold and Warm Compacted Alumix 431 Alloy (Al-5.5 Zn-2.5 Mg-1.5 Cu) A K Eksi, G Veltl, F Petzoldt, K Lipp, C M Sonsino	59
The Microstructure Characteristics of PM Hypereutectic AlSiNi alloy Lazar P and Durisin J	65
Enhanced Sintering of MA Al with Silicon Additives E J Herrera, J A Rodriguez, J J Fuentes	71
Development of Powder Metallurgical Aluminium Alloys and Applied Processes Dr V Arnhold, Dr H Balzer, N DeCristofaro, Dr V Kruzhanov, M Laux, R Lindenau	77
Characterisation of Aluminium Foams obtained through Solar Energy Foaming Treatment LEG Cambronero, J M Ruiz-Roman, I Cañadas, F A Corpas, D Martinez	83

Influence of the Precursor Manufacturing Conditions on Al-7Si-1 Mg Foam Properties LEG Cambronero, JM Ruiz-Roman, R. Gamboa, JM Ruiz-Prieto	89
Novel Process for High Porosity Closed Cell Metal Foams Production Toru SHIMIZU and Kunio MATSUZAKI	95
Nanoindenter Measurements for the Determination of the Mechanical Properties of Hollow Sphere Structures Thomas Studnitzky, Olaf Andersen	107
Reinforced Aluminium Foam Profiles F Simancik, R Florek, P Tobolka	113
Investigations on the Expansion Behaviour of Granulated Foamable Precursor Material Dipl.-Phys. Joachim Baumeister, Dipl.-Ing. Karsten Stöbener	119
Structural Engineering of High-Porous PM Materials Podrezov Yu N	125
Molybdenum Hollow Sphere Structures for High Temperature Applications J Färber, A Bojack, M Stoiber, A Plankensteiner; H Goehler; H Schneidereit	131
Regular Metal Foams produced by Expandable Polystyrene Technology M Reinfried, U Waag, G Stephani, B Kieback	137
Cellular Structures Based on Metallic Hollow Spheres – Mechanical and Acoustical Properties Ulf Waag, Günter Stephani, Jörg Färber, Helmut Venghaus, Gert Bingel	143
Decomposition Behaviour of As-Received and Oxidized TiH₂ Powder Biljana Matijasevic, Sebastian Fiechter, Ivo Zizak, Oliver Görke, Nelia Wanderka, Peter Schubert-Bischoff, John Banhart	149
Comparison of Porous Materials Properties made from Sponge Titanium Powders produced by Different Methods V V Savich, L P Pilinevich, M V Tumilovich	157
Effectiveness of Application of Porous Powder Materials for Separation of Water from Petroleum Products V V Savich, L P Pilinevich, M V Tumilovich, A V Petracov	163
New High Productive Catalysts in the Base of Cell Materials Leonov, Andrey; Romashko, A N; Sheleg, V K	169
Production of Porous Metal Materials by Injection and Extrusion Moulding Satoru Matsuzaki, Masashi Ishida, Shigeo Tanaka and Kazuaki Nishiyabu	175
Development of Porous Composite Membranes for Microfiltration Devices M Bram, H P Buchkremer, D Stöver	183
Direct Typing – a New Method for the Production of Cellular P/M Parts Olaf Andersen, Thomas Studnitzky, Jörg Bauer	189
Porous Sintered Metal for Diesel Soot Filtration Simon Steigert	195
Preparation and Properties of Carbon Nanotube MMCs Christian Edtmaier, Eva Wallnoefer, Anton Koeck	201
On the Development of Warm Compaction for Aluminum Alloys A Simchi, G Veltl	207

Properties of Multiwall Carbon Nanotube-Reinforced Cu Matrix Composites	
Jung-Ho Ahn, Hyung-Seop Shin, Yong-Jin Kim, and Hyungsik Chung	335
Metal Injection Moulding	
Metal Injection Moulding of Heat Treated Alloy 718 Master Alloy	
P A Davies, G R Dunstan, A C Hayward and R I L Howells	343
Aluminum Heat Sink from Powder Injection Moulding	
Lye-King Tan, Hoe-Phong Tham, Jan Ma	349
Powder Injection Molding – World Markets and Technologies	
Robert G Cornwall, Randall M German	357
Fabrication of Heat Transfer Devices by Metal Injection Molding	
John L. Johnson and Lye King Ta	363
Feasibility Study on the MIM of Anisotropic NdFeB Magnets	
Thomas Hartwig, Lutz Kramer, Philip Imgrund and Frank Petzoldt	369
<i>In situ</i>, Non-contact monitoring of Powder Compacts during Polymer Removal	
R P Koseski, C Binet, Randall M German	375
Processing Condition and Advantage of Metal Co-Injection Moulding	
K Okubo, M Ishida, S Tanaka, K Nishiyabu	381
The Modified Processes of Ferrite Powder Granulation with Plate Granulators	
V Andreev, A Gonchar, L Letyuk, V Mayorov, S Menshova	389
Influence of the Powder Surface Treatment with Stearic Acid on Powder Injection Moulding of M2 HSS Using a HDPE Based Binder	
G Herranz, R Nagel, B Levenfeld, R Zauner, A Várez, J M Torralba	397
Gaseous Nitrocarburizing with Post-Oxidation for MIM-Steels	
Marcel Sonderegger, Bernard Kuntzmann	403
Rapid Tooling for PIM	
Rudolf Zauner, Walter Grienauer, Georg Korb	409
Powder Injection Moulding of thin-walled parts	
Christian Gornik	415
Metal Injection Moulding of Agar-Steel Feedstocks	
E. Carreño-Morelli, S. Crettenand, M. Brehmer, F. Dirren, S. Martinerie, C. Bonjour	421
Rheological Properties of Feedstocks produced from Peg Based Resins	
Murat GOKTEN, Cetin KARATAS, H. Ibrahim UNAL, Suleyman SARITAS	427
Effect of Moulding Parameters on Final Sintered Component Dimensions	
Donald F Heaney and Cody G Greene	433
Characterisation of Feedstocks by Injection Moulding	
Dipl. Min. Hartmut Walcher , Dipl.-Ing. Marko Maetzig	439
Improvement of Ductility for Injection Moulding Ti-6Al-4V Alloy	
Yoshinori Itoh, Tatsuya Harikou, Kenji Sato and Hideshi Miura	445
Effect of TiC addition on the rheological behavior of 316L stainless steel feedstock	
A Simchi, M Khakbiz, R Bagheri	451

Metal Injection Moulding of an Advanced Bone Screw 7Nb Alloy Powder W Limberg, E Aust, T Ebel, R Gerling, B Oger	.457
Processing Parameters for the Powder Injection Moulding of Pure Niobium Gaurav Aggarwal and Ivi Smid	.463
Microstructure and Mechanical Properties of T15 High-Speed Steels Parts Produced by Powder Injection Moulding using a Polyethylene Based Binder G Matula, G Herranz, A Várez, B Levenfeld, J M Torralba, L A Dobrzanski	.469
Influence of Different Powder Particle Sizes and Binder Systems on the Mechanical and Shape Memory Properties of Metal Injection Moulded NiTi Parts Lars Krone; Bram, M; Mentz, J; Buchkremer, H-P; Stöver, D	
Ceramic Injection Moulding of Ni-Zn Ferrites using Thermoplastic Binder Based on PP E Rodriguez-Senin, G Herranz, D F Heaney, A Varez, B Levenfeld, J M Torralba, R M German, M A Paris	.477
Influence of Different Powder Particle Sizes and Binder Systems on the Mechanical and Shape Memory Properties of Metal Injection Moulded Ni Ti Parts L Krone, M Bram, J Mentz, H -P Buchkremer, D Stöver	.485
Metal Injection Moulding of Nickel Base Superalloys for High Temperature Applications A Thom	.493

PM Functional Materials

Fabrication, Physico-Technological Properties and Application Field of Powder Iron-Nickel Alloys V A Maslyuk, O A Panasyuk, O V Vlasova, V Ya Kurovsky	.499
Influence of Compacting Pressure Conditions on Reduction in Coercive Force of Hard-Ferrite Powders Kunio Okimoto, Tomotaka Kuroda, Seiichi Hosokawa and Sachio Toyota	.505
Influence of Heat Treatment Parameters on Properties of NdDyFeCoNbAlCuB Sintered Magnets Lukin, A Matveyenkov	.511
Developments of Sintered Electromagnetic Stainless Steels Kazuo Asaka, Chio Ishihara, Koetsu Abe, Yu Maeta	.517
Case Study of the Process of Sintering and Heat Treatment of Stainless Soft Magnetic Material Attained through Mechanical Alloying A V Dovydenkova, V A Dovydenkov, V P Yaltayev, M V Yarmolyk	.523
Crystallization Behavior of Rapidly Quenched Nd-Fe-B with Nd Low Content Nadežda Talijan, Jasna Stajic-Trošić, Vladan Cosovic, Aleksandar Grujic, Dragutin Nedeljkovic, Tomáš Šák	.527
Process of Coating Optical Fiber with Composite Coating: Composite Coating: Magnetic Powder – Polymer V Radojevic, N. Talijan, A. Grujic, D. Nedeljkovic, R. Aleksic	.533
Microstructure and properties of Nd-Fe-B magnets, produced from gas-atomization powders V Vystavkina, G. Brecharya, E Vasilyeva	.539

Low Core Loss Compressed Cores with Atomized Fe-Si Powders S Takemoto and T Saito	.545
Magnetic Materials produced by Hot Plastic Deformation of Gas Atomised Fe-Nd-B Powders V V Savin, A V Evstafenko, V V Buldygin, A M Bovda, V A Bovda, L V Onischenko	.551
The Influence of Kind of Powder on Physical Properties of Nd-Fe-B Dielectromagnets Barbara SLUSAREK, Lech PASZKOWSKI, Dionizy BIALO	.555
The Effect of Processing and Density on PM Soft Magnetic Properties Ian W Donaldson	.561
Keynote: High Performance Nanocrystalline Functional Materials L Schultz, O Gutfleisch, A Kirchner, A Bollero, E Botcharova, J Freudenberger, O Perner, W Haessler, C Fischer, B Holzapfel	.569
Origination and Investigation of Properties of Powder Magnetic-Soft Materials, based on the Iron Powders, Clad with Metal and Non-Metal Components V . Maslyuk, O.A. Panasyuk, H. Danninger, V.G.Lyulko, A.V. Minitzky, L.M.Apininska	.577
Production Aspects of SMC Components Zhou Ye, Lars Hultman and Lisa Kjellén	.583
Existing and Future Automotive Applications for Soft Magnetic Composites Lars Hultman	.591
Dielectromagnetic Rotor of Induction Motor Dr inż Stanislaw Azarewicz, Mgr inż. Jaroslaw Koniarek, Prof. dr hab. inż Bogumil Weglinski	.599
Use of Soft Magnetic Composite Materials in Industrial Applications C Gélinas, P Viarouge and J Cros	.605
Performance and Properties of Highly Dense Soft Magnetic Composites Kazuo Asaka, Chio Ishihara, Tamio Takata	.611
Development of Low Power Loss Soft Magnetic Materials using PM Method H Toyoda, T Maeda, N Igarashi and T Nishioka	.617
Soft Magnetic Composite Materials Based on the Nanocrystalline Ni₃Fe Intermetallic Compound I Chicinas, O Isnard, O Geoffroy, V Pop	.623
SMC Materials in the Design of Small Electric Motors for Domestic Application B Sustarsic, A Sirc, D Miljavec	.629
The Fatigue Behaviour of Soft Magnetic Composite Powders M J Dougan, Y Torres, A Mateo, L Llanes	.637
Research on the Process of Combustion in the Ternary System Mo-Si-Al and Manufacturing of Dense Mo(Si,Al)₂ Dense Samples M Gutierrez, I Agote, U Rezabal, S L Kharatyan, A R Sargsyan	.645
Research about obtaining a New Technology for the Composite WNiCu C-I Pascu	.653
Fabrication of Anisotropically Structured P-Type and N-Type Bi-Te Thermoelectric Materials via New PM Route S S Kim, T Aizawa, S Yamamoto	.659

Preparation of Aluminum Nitride Based Functionally Graded Substrate for High-Power-Semiconductor Modules M Wildersohn, M Willert-Porada, R Borchert, B Bakija	.665
Manufacturing and Properties of some Particulate Reinforced Copper Matrix Composites Ivanus Radu Cristian	.671
Preparation of Monosized Micro-Particles of Semiconductor Materials K Takagi, A Kawasaki, R Watanabe	.677
Tailored Functional Gradients by 3D-Printing using Metal Powder and Nano-Particulate Inks D Godlinski, F Petzoldt, S Morvan	.683
Copper-Coated Graphite Composites for Sliding Electrical Contacts A Bara, P Lungu, A-M Bondar	.691
Sintering Behaviour in Solid State of a W-25wt%Cu Composite Powder prepared by Mechanical Alloying F Alves da Costa, F Ambrozio Filho, A G Pereira da Silva	.697

PM Non Ferrous

Processing of Ni/Al Intermetallic and its Composites Using Particle Coating Route S.F.Moustafa, Z.Abdel-Hamid, S.S Abdel Rehim, and W.M.Rashad	.705
Band Materials with Coating Based on Composite Powder Systems V A Kovtun, Yu M Pleskachevsky, E A Zhirnov and O M Shalobalov	.711
PM Synthesis of Low Porous Titanium Alloyed with Eutectic-Forming Elements O.M. Ivasishin, D.G. Savvakina, X.O. Bondareva	.719
Structure and Mechanical Properties of Sintered Compact and Porous Nanolaminates (Ti₃SiC₂) in the Temperature Range 20 - 1300C S. A. Firstov, E. P. Pechkovsky	.725
Analysis of Carbon and Boron Behaviour in PM Ni-base Superalloys of the Type EP741NP A.V. Shulga, A.A. Ofitserov, L.G. Kuzmicheva	.731
Performance of New Dispersion-Precipitation Strengthened Copper-Ceramic Materials made by Mechanical Alloying M Lopez, V Vergara, C Camurri, J A Jimenez, O Ruano	.737
Fundamental Criteria of the Sintered Friction Materials Basic Component Optimal Selection Serban DOMSA, Liviu BRANDUSAN	.743
Study of the Tribological Behavior of Asbestos-free Cu-base Brake Lining R Ehsani and A Simchi	.749
Tribology of Cu₂S comparing with MoS₂ as a solid lubricant Dong-Kyu Park, Kwang-Chul Jung, Han-Young Lee	.755
Study concerning the Increase of the Utilisation Ratio of a Nickel Based Powder obtained through Gas Atomisation Cândea Viorel, Lapusan Smaranda, Popa Angela, Popa Catalin Rosso Mario	.763
Wear Behaviour of some Copper Porous Antifriction Alloys Stefan Gheorghe, Ion Ciupitu, Andreas Merstallinger, Gottfried Kladler	.769

Self-lubricating Copper Composites for Vacuum and Space A Merstallinger, E Neubauer, V Calard, L Gaillard, L Pambaguian	.775
Effect of Size-Dependent Pore-Deformation on Bubble Structure of Potassium-Doped Tungsten O Horacek, L Bartha	.783
Chemical Synthesis of Copper Coated W-Powder C Edtmaier	.789
Preparation and Properties of ODS-Platinum C Edtmaier	.797
Powder and Smelting Metallurgy for Cu-30%Cr Alloy M I Karpov, V P Korzhov, V I Vnukov, S I Malahovsky, P A Frolov	.805
PM Tantalum Sheet and Plate for Electronics Applications P Kumar, H Uhlenhut, R R Malen, P Jepson, R Wu	.811
Advances in PM-Niobium Products R R Malen, H Uhlenhut	.817
Sintering of Tungsten-based Heavy Alloys with NiB and FeB Additives M Debata, A Upadhyaya	.825
Powder Metallurgy of Tungsten Alloys (Alloying, Pretreatment, Sintering, TMT, Structure, Properties) Povarova Kira	.831
Effect of the Microstructure of W-Y Based Ball-Milled Powders on Compaction and Sintering R Taillard, M-N Avettand-Fenoel, J Dhers, J Foct	.839
'PM' used for Bio-Metallic Materials. Application to a Cobalt Base Alloy with 28%Cr and 6%Mo J-Y Moraux, M Pierronnet	.845
