At the crossroads of science, heritage and diplomacy

Public Lecture 02.12.2026 at 18:15 in Adlershof

Kirsi Lorentz, Ioanna Mantouvalou and Maram Na'es will shed light on the hidden aspects of research on cultural heritage.

What do 20th century German art and 2000-year-old murals in the Jordanian city of Petra, or ancient human tissues have in common? Thanks to X-ray light, hidden traces can be revealed making the invisible visible.
Kirsi Lorentz (The Cyprus Institute), Ioanna Mantouvalou (Helmholtz-Zentrum Berlin) and Maram Na'es (Technische Universität Berlin) will take us on a journey into cultural heritage and science diplomacy.
