

Helmholtz Imaging is calling for the Best Scientific Image 2023

We are pleased to announce that the new call for Best Scientific Image 2023 is now open. Submit your scientific image(s) for a chance to win Helmholtz Imaging Best Scientific Image 2023! The deadline for submission is Wednesday, 15 March 2023.

The image competitions in 2021 and 2022 have been a great success, and the winning images travelled Germany to showcase the outstanding portfolio of the Helmholtz Association in imaging and the contribution of imaging science in solving major societal challenges.

Images submitted for competition can be the **result of any imaging technique** developed or applied at Helmholtz Centers or they may be the **result of combining several** of those images into one artistic image. An appealing, comprehensible explanation must be submitted with the image, providing background information on the scientific nature, remarkableness and origin of the image.

The contest is open to anyone who works at a Helmholtz Center.

An international jury will award valuable **prizes worth a total of 6000€** donated by Beiersdorf, Siemens Healthineers and Zeiss Microscopy.

Awarding is based on scientific significance, originality, and artistic and/or visual impact of the image.

The winning images will be displayed at the **Helmholtz Imaging Conference 2023** (14-16 June 2023) and made available to the public and the media as well as to scientific institutions. In addition, 12 winning images will be published in the Helmholtz Imaging calendar 2024 and 20 of the best images will be part of a travelling exhibition and being displayed in different Helmholtz Centers and beyond.

Aside from the **Jury Award** there are two additional opportunities planned for your images to be recognized:

- Via a **Public Choice Award** where the entire imaging community can vote for their most popular image.
- Via a **Participants Choice Award** where the participants of the Helmholtz Imaging Conference vote for their favorite image.

The **awarding ceremony** is planned for the [Helmholtz Imaging Conference 2023](#) on 14-16 June in Hamburg. Save the date, register and be there!

And now, you are just three steps away from [participating](#).

Best of luck!

The Helmholtz Imaging Team
